

Ismail Al Ghani

I am a front-end software engineer with 3+ years of experience in engineering roles. Interested in building magical web/mobile experiences that engage users and drive business success.

South Jakarta, South Jakarta City, Jakarta, Indonesia

Work Experience

Frontend Developer • PT. Astra Graphia Information Technology (AGIT)

July 2023 - January 2024

- Developed website for Client AGIT.
- Developed CRM web and handled Product, Account, and Rating Billing Invoice modules.
- Mentoring Junior Frontend Developer.
- Lead squad Product Module.
- Tech Stack uses React JS, Redux, Tailwind CSS, Ant Design, and GIT.

Software Development Engineer - Frontend • Sayurbox

June 2022 - May 2023

- Developed website and mobile app Sayurbox.
- Developed the Refund feature and achieved the goal of simplifying the refund process and adding the option to refund cash instead of using a voucher for refund compensation.
- Developed the Loyalty Tiering feature which aims to increase retention and acquisition of new users with more benefits when reaching a certain tier level.
- Developed the push notification push template which has a good impression. The number of clicks increases 2x when using the push template variant.
- Improve the push notification and increase the number of push notifications received.
- Tech Stack uses React Native, React JS, Redux, GraphQL, Svelte JS, CleverTap, and GIT.

Software Engineer Analyst • Amartha

March 2021 - June 2022

- Developed website Admin Panel Amartha Plus.
- The website functions to control integration with third parties, determine credit limit changes, display dashboard data from Amartha's business partners, etc.
- The website Tech Stack uses React JS, Redux, and GIT.

Frontend Developer • PT. Gema Inovasi Teknologi

October 2020 - March 2021

- Developed HRIS website for internal HR who subscribe to my product. The website has a function to maintain from the recruitment process until payroll. For Tech Stack using Angular.
- Developed HRIS mobile app for companies who subscribe to my product. The app has a function to request time off, reimbursement, live attendance, etc. For Tech Stack using Ionic 5 and Angular.

Front End • Skydu

June 2019 - August 2019

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat.

Education
